

Requirements for Your Next Steps

A quick checklist to complete as part of your next steps

Thank you for completing your assessments and interview with AB Business Support Services! Before we move forward with a formal offer, we ask you to complete the following technical checks. These help us confirm your device and connection are fully equipped for remote work.

1 Device Specifications

Provide a screenshot of your device's system information:

Mac	Windows
Apple menu → About This Mac → screenshot the overview window.	Settings → System → About → screenshot the Device & Windows specifications section.

2 Internet Speed Test

- Go to speedtest.net and run the test.
- Take a screenshot of the results showing your download and upload speeds.

Minimum recommended: 25 Mbps download / 10 Mbps upload for stable remote work performance.

3 Typing Speed Test

- Go to typingtest.com and complete the 1-minute test.
- Take a screenshot of your result showing WPM and accuracy.

Tip: use the standard English text option for the most consistent result.

4 Device Security Scan

- Download [Malwarebytes](https://www.malwarebytes.com) (free for personal use) and install it.
- Run a full scan and wait for it to complete.
- Take a screenshot of the completed scan results screen.

A paid license is not required. If any threats are detected, please note them in your submission.

Use the Submission Template

We've prepared a Google Doc template where you can insert your screenshots directly.

Open the template → [IC Requirements Submission Template](#)

Once open: File → Make a copy → Insert your screenshots → Share back to us.

Submission Instructions

Please compile all four (4) screenshots and send them to admin@ab-businesssupport.com.

Subject line: Pre-Onboarding Requirements — [Your Full Name]

Thank you for completing these requirements — we're looking forward to the next steps with you.
